

Profile

AI engineer (TypeScript, Python, Go). Most recently at starc., where I designed, built and owned the entire AI side of an AI-native investing app, now live on the App Store with 500+ active users. Two years at Vendure, the 8,000-star open-source commerce platform, building enterprise B2B systems for its largest customers. 2nd place, TUM.AI x Anthropic hackathon.

Professional Experience

Founding AI Engineer, starc. Berlin (Hybrid)

Apr 2026 — Sep 2026

- First engineering hire; designed, built and owned the entire AI side of an AI-native investing app, from architecture to production, in six months
- Market-moments engine: scans price data and news, detects significant moves and attributes a cause at macro, sector and asset level across 2,000+ assets
- RAG and personalisation over live market data, grounding every explanation in the user’s own portfolio; 10,000+ insights generated for 500+ active users
- Evaluation harness for agent output: regression testing across prompt and model changes, trace-level failure analysis; plus a large share of product and DevOps work

TypeScript, Python, Go, Anthropic, Gemini (Vertex AI), GCP, Cloudflare, RAG, evals

Software Engineer, Vendure Vienna

Apr 2024 — Mar 2026

- Open-source commerce platform (vendure.io; 8,000+ GitHub stars; IBM, Breitling, QVC). Joined via ALPIN11 / Elewantiq, the agency that owned and later merged into Vendure GmbH, on a team of about seven
- Built and shipped a rules-based chimney configurator for Stocker Kaminsysteme solo in about five months: hundreds of sizing rules over thousands of parts synced from Pimcore, orders created directly in Vendure
- Multi-tenant, white-label B2B shops for Flowtech Fluidpower (migration off a legacy enterprise platform; total cost of ownership halved per Vendure’s case study) and the Feddersen Group (8+ tenants)
- Consolidated Stocker’s legacy codebases into one monorepo, upgraded all dependencies and moved hosting to Docker Swarm; plugins, dashboard features and fixes for Vendure core and enterprise suite

TypeScript, NestJS, Next.js, GraphQL, PostgreSQL, Pimcore, Docker Swarm, Nx

Earlier: Software Engineering Intern, IBM iX (2022)

Ventures

Side ventures, co-founded and run alongside employment. Mira and Copile are wound down.

Co-founder & Engineer, Mira London (Remote)

Nov 2024 — Aug 2025

- Co-founded a Solana trading bot in Go: real-time signal processor executing 8,000+ trades/month at sub-300ms
- 99.5% uptime over ten months with monitoring dashboards; led a remote team of 3 engineers

Co-founder & Engineer, Copile London (Remote)

Sept 2022 — Mar 2024

- Scaled a B2B crypto trading platform to 2,100 users and EUR 1.2M monthly volume
- Led a cross-functional team of 6 (4 engineers, 2 designers)

Co-founder, Klarity

2025 — Present

- Prediction-market analytics platform: streaming pipeline processing 180M+ on-chain records into ClickHouse, wallet clustering and cross-platform arbitrage across Polymarket and Kalshi

Selected Projects

Synapse (2025) — Semantic search platform that finds the right internal expert instantly. Full stack in 36 hours. 2nd place, TUM.AI x Anthropic Hackathon

Richard (2025) — AI research system: tracks sources, spots patterns, drafts reports. Cuts 8h of manual research to 30 min. 400+ insights in 8 weeks

chtype (2026) — Type-safe ClickHouse toolkit for TypeScript, built for my own analytics platform: schema codegen, query builder, enhanced client. Open source, on npm

Skills

AI & LLM	RAG, agents, evals, LLM orchestration, prompt & context engineering, MCP, Anthropic & Gemini APIs
Languages	TypeScript, Python, Go
Web	Next.js, React, NestJS, GraphQL
Data	PostgreSQL, ClickHouse, Pimcore
Infrastructure	GCP, AWS, Docker, Kubernetes, Cloudflare

Education

B.Sc. Information Systems, Technical University of Munich Munich

Oct 2024 — exp. Jun 2027, alongside full-time work | Focus: AI-driven systems, algorithmic trading, quantitative analysis

Matura in Computer Science, HTL Wels (Higher Technical College) Wels

Sept 2018 — Jun 2023 | Passed with distinction (best in year); diploma thesis nominated for the TGW Award
