Profile

Full-stack and AI engineer (TypeScript, Python, Go) focused on revenue-critical financial systems. Most recently at starc., where I built and owned the entire AI side of an AI-native investing app, live on the App Store. Co-founded a Solana trading bot netting \$230K in five months at 8,000+ trades per month, and a B2B crypto trading platform reaching 2,100 users and EUR 1.2M monthly volume. Two years at Vendure building enterprise B2B commerce.

Professional Experience

Founding AI Engineer, *starc.* Berlin (Hybrid)

Apr 2026 — Sep 2026

- First engineering hire; designed, built and owned the entire AI side, from architecture to production, in six months
- Market-moments engine: scans price data and news, detects significant moves and attributes a cause at macro, sector and asset level across 2,000+ assets
- RAG and personalisation over live market data, grounding every explanation in the user's own portfolio; 10,000+ insights generated
- Evaluation harness for agent output: regression testing across prompt and model changes, trace-level failure analysis

TypeScript, Python, Go, Anthropic, Gemini (Vertex AI), GCP, Cloudflare, RAG, evals

Software Engineer, *Vendure* Vienna

Apr 2024 — Mar 2026

- Open-source commerce platform (vendure.io; 8,000+ GitHub stars; IBM, Breitling, QVC). Joined via ALPIN11 / Elewantiq, the agency that owned and later merged into Vendure GmbH, on a team of about seven
- Built and shipped a rules-based chimney configurator for Stocker Kaminsysteme solo in about five months: hundreds of sizing rules over thousands of parts synced from Pimcore, orders created directly in Vendure
- Multi-tenant, white-label B2B shops for Flowtech Fluidpower (migration off a legacy enterprise platform; total cost of ownership halved per Vendure's case study) and the Feddersen Group (8+ tenants)
- Consolidated Stocker's legacy code into one monorepo, upgraded dependencies, moved hosting to Docker Swarm; plugins and features for Vendure core and enterprise suite

TypeScript, NestJS, Next.js, GraphQL, PostgreSQL, Pimcore, Docker Swarm, Nx

Earlier: Software Engineering Intern, IBM iX (2022)

Ventures

Side ventures, co-founded and run alongside employment. Mira and Copile are wound down.

Co-founder & Engineer, *Mira* London (Remote)

Nov 2024 — Aug 2025

- Co-founded a Solana trading bot in Go, netting \$230K profit in five months; led a remote team of 3 at 99.5% uptime
- Real-time signal processor: 8,000+ trades/month, 92% success rate, sub-300ms execution
- Automated token-launch pipeline deploying in under 300ms; helped launch tokens to \$200M+ total market cap

Co-founder & Engineer, *Copile* London (Remote)

Sept 2022 — Mar 2024

- Scaled a B2B crypto trading platform to 2,100 users and EUR 1.2M monthly volume
- Led a cross-functional team of 6 (4 engineers, 2 designers)

Co-founder, *Implyra*

2025 — Present

- Prediction-market analytics platform: streaming pipeline processing 180M+ on-chain records into ClickHouse, wallet clustering, arbitrage across Polymarket and Kalshi

Education

B.Sc. Information Systems, *Technical University of Munich* Munich

Oct 2024 — exp. Jun 2027, alongside full-time work | Focus: algorithmic trading, quantitative analysis, AI-driven systems

Matura in Computer Science, *HTL Wels (Higher Technical College)* Wels

Sept 2018 — Jun 2023 | Passed with distinction (best in year)

Skills

Trading & Fintech	Solana, real-time market data, low-latency execution, on-chain analytics
AI & LLM	RAG, agents, evals, LLM orchestration, prompt & context engineering, Anthropic & Gemini APIs
Languages	TypeScript, Python, Go
Web	Next.js, React, NestJS, GraphQL
Data	ClickHouse, PostgreSQL, Kafka, Redis, Pimcore
Infrastructure	GCP, AWS, Docker, Kubernetes, Cloudflare

Selected Projects

Neura (2022) — Solana NFT sniping bot with millisecond precision and on-chain transaction handling. Subscription product. Acquired

Synapse (2025) — Semantic search platform that finds the right internal expert instantly. Full stack in 36 hours. 2nd place, TUM.AI × Anthropic Hackathon

chtype (2026) — Type-safe ClickHouse toolkit for TypeScript, built for my own analytics platform: schema codegen, query builder, enhanced client. Open source, on npm
